NO. OF ENCLS. 1
(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

25X1X

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT, 50

25X1

1. The Molotov Plant in DNEPROPETROVSK (34°59' E/48°27' N), Ukrainian SSR, is on the southern bank of the Dnepr River, north of the railroad line to DNEPRODZERZHINSK and about 1.2 miles west of the large railroad bridge. East of the Molotov Plant there is a steel mill with a locomotive factory on the east.

2. Plant Installations:

The plant, in existence for a long time, is a sister plant of the DNEPRODZERZHINSK rail mill. Half of the plant was destroyed in the war. Reconstruction work started in 1944 and is continuing. A large section of the plant is in operation and strictly off limits to PWs. PWs were clearing the debris and excavating sites for new workshops in the eastern section of the plant. For layout of the three sections of the plant see Annex.

3. Work Force:

Seven to eight hundred PWs working in three shifts in the eastern section of the plant. The number of workers in the western section is unknown.

Comment:

a. From the roughly drawn attached sketch which shows the slight bend of the Dnepr River to the north of the plant and the road fork to the southeast of the plant it is concluded that the Molotov Plant is a plant previously designated Lenin Plant (compare object 10 of military map dated September 1941). From the striking similarity of the attached sketch with the mentioned map that map.

b. The information on the location of the plant agrees with a previous report.
